SUBJECT: State v. Inmar (Carlstadt)

This is to remind you that the Court has scheduled a hearing for March 8, 1984 on the State's contention that the cleanup is not proceeding expeditiously. The Court has urged that a timetable be worked out to satisfy the State so that a hearing will not be necessary, and the State has indicated that would be acceptable.

I think it is imperative that we avoid a hearing. I see no reason why the material in the drums and the aqueous layers cannot be removed before March 8 and a proposal for removal of the sludge submitted.

At some point, the Court is going to lose its patience. Right now the State is leaning very heavily on SCP et al. for the Newark site. We seem so close to finalizing the preliminary stages that I think all efforts should be directed at avoiding being sucked into a whirlpool that is primarily caused by the Newark site.

Can I have your views as to how to address this problem? Perhaps a meeting at the beginning of next week would be helpful.
